

CELEBRATING NATIONAL SCIENCE MONTH

Science, technology and innovation are for everyone!

1 to 31 July 2026 across the country

National Science Month, an expansion of National Science Week, gives individuals and institutions a focused opportunity to interest South Africans in science, technology and innovation and show how they affect our lives.

We are calling everyone – science councils, industry, universities, schools, TVET colleges, and government departments from across the country – to join us and demonstrate their connection to science, technology and innovation.

How to participate

Participation in National Science Month is voluntary, inclusive and flexible. We encourage creativity and self-driven activities, allowing everyone to contribute in line with their own interests and resources. For some ideas on how to get involved in your own way, please visit [NSM Framework site](#).

Register your activities

Ensure that your contribution is recognised and counted by registering your planned activities at [Public Events site](#).

Join the movement

National Science Month is more than a celebration of science; it is a national movement to bring science closer to society,

- *Get involved. Lead an activity.*
- *Make an impact where you are, with what you have.*
- *Inspire others*

Together, we can build a science-aware, science-literate society for a better future.

National Science Month belongs to YOU!

Making sure it's possible
